SUMMARY

Backend-focused Software Engineer with 6+ years of experience building scalable, high-availability distributed systems serving millions of users. Proven track record in designing microservices, optimizing data pipelines, and improving system performance using **Golang**, **MySQL**, **Redis**, **OpenSearch**, and **AWS**. Experienced in owning features end-to-end, from architecture to production deployment.

SKILLS

- **Languages & Frameworks:** Go (Golang), TypeScript, React.js
- **Databases & Data Stores:** MySQL, Redis, Elasticsearch/OpenSearch
- **Infrastructure & Tools:** Docker, Kubernetes, AWS, Git, Bitbucket
- **Core Competencies:** Distributed Systems, Microservices Architecture, REST APIs, System Design, Data Pipelines, Performance Optimization
- **Streaming:** Redis Streams
- **Problem Solving, Data Structures & Algorithms**

WORK EXPERIENCE

IMPELSYS PRIVATE LTD.

Software Engineer 3

Bengaluru, India

Aug 2022 – Present

- **Distributed Credit Claim Platform:** Designed and owned a high-throughput **Golang** based credit claim processing platform integrating multiple external LMS providers for the **American Heart Association**, serving millions of healthcare professionals.
- **Large-Scale Data Migration:** Led migration of **40M+ records to OpenSearch** using a zero-downtime pipeline with batch processing and data validation, ensuring consistency and minimal production impact.
- **Reporting Microservice:** Designed and built a reporting **microservice** in **Go** backed by **MySQL and OpenSearch**, enabling efficient querying and filtering across millions of transactional records.
- **Reporting Dashboard UI:** Built a multi-page **React.js reporting interface** featuring dynamic field selection, customizable report configurations, and saved report persistence.
- **Asynchronous Data Pipeline:** Architected an asynchronous data pipeline to reliably sync new records from MySQL into OpenSearch, decoupling writes from indexing and ensuring consistency at scale
- **Streaming Export Engine:** Built a high-performance export flow that streams large record sets in batches directly into XLSX and CSV files, with automatic file splitting based on configurable row limits, eliminating memory bottlenecks on large exports.
- **Redis Caching Layer:** Implemented Redis-based caching for frequently accessed metadata, **reducing database load**, cutting API latency by **~50%**, and **lowering infrastructure costs** by reducing downstream compute and DB query volume.
- **Batch Ingestion Pipeline:** Built a robust XML batch ingestion pipeline to ingest data from external systems, processing records in sub-batches with validation and error handling for reliability.
- **Containerized Deployments:** Deployed and operated all services on **Docker and Kubernetes**, ensuring scalability, zero-downtime deployments, and fault tolerance.

INFOSYS PRIVATE LTD.

Senior System Engineer

Bengaluru

Aug 2020 – Aug 2022

- **React Frontend:** Developed and maintained **React.js user interfaces** for internal enterprise tools, ensuring responsive design and reusable component structure using **TypeScript, React**, and **CSS Modules**.
- **REST API Development:** Assisted in developing and maintaining backend services in **Golang**, mainly focusing on implementing REST APIs and bug fixes.
- **Security & Upgrades:** Performed Go and React application upgrades and resolved security vulnerabilities identified through dependency and security scanning tools.

MILOPLE PRIVATE LTD.

Software Engineer Trainee

Bengaluru

June 2019 – Jan 2020

- **Full-Stack Development:** Built dynamic, responsive React.js UIs integrated with RESTful APIs developed in PHP, delivering end-to-end feature ownership.

EDUCATION

- B.E in Information Science
Canara Engineering College, Mangalore

Aug 2015 – Jun 2019
